

AKINTOLA OLADAPO

Software Developer

PROFILE

Junior developer building backend systems and desktop applications in Python. Comfortable across Django, Flask and FastAPI on the backend, and PySide6 for desktop interfaces, with HTMX and Tailwind for web interfaces.

EDUCATION

B.Sc Computer Science, Olabisi Onabanjo University

WORK EXPERIENCE

Creator and Developer | MPFUN

Personal project | 2025

- Built playback and library management with PySide6 and python-vlc.
- Used Cython for performance-critical parts.
- Used Peewee for local data storage.

Full Stack Developer | MagSpire (client project)

2026

- Handled backend development in Django.
- Built the frontend markup and styling with HTML, CSS and Tailwind.
- Deployed with Docker on Render.

SKILLS

Languages

Python, Cython, HTML, CSS

Backend

Django, Flask, FastAPI

Desktop

PySide6, Tkinter

Frontend integration

HTMX, Tailwind
